Jockey's Conference Center (JCC)

JCC is a famous conference center located in Jakarta, Indonesia. **JCC** is one of the earliest as well as popular convention centers in Jakarta. First opened in 1974, **JCC** many important national and international conference, exhibition, fair, indoor sports, and musical concerts were held at **JCC** including 11th Non-Aligned Movement Conference and Asian-African Conference. It is a very venue place throughout the year.

JCC is currently planning to create a website for their conference center services. So **JCC** can reach their goal to become an international level conference center in Indonesia. So, the **JCC** website need to have simple and elegant design. To achieve that, **JCC** needs to create a **website prototype** and **company website** that represents the **JCC** image. So, **JCC** entrusts you as a web designer to **design their website prototypes** and **create a company website**.

The **requirements** from **JCC Shop** are described below:

1. **JCC** wants you to design the **website prototype** of all **five pages** before making the HTML files. The website prototype will be created using **Figma**. Ensure the website prototype that you created is the **exact same** with the website that you will make later. Each page will contain **header, navigation, content, and footer** as its structure. Consider the **color, layout, and consistency** when designing the prototype.
2. **JCC** wants you to build the **website attractive, appealing, fully functional**, and make sure the website is **responsive**. The website should be accessible using a mobile phone in a perfect way. To achieve that, use **5 kinds of CSS property** and **JavaScript**. Use **meta viewport tag**.
3. The website consists of **five main pages**. They are **Home Page, Events Page, Price List Page, About Us Page, and Contact Us Page**. Below are the **requirements** for each page:
 - **Home Page**
This page shows **brief information** about **JCC**, and the **latest upcoming event** held there.
 - **Events Page**

This page shows **a list of the events** that are held by **JCC**. Make sure to provide **name, event date/time, description, and image** of the events so customer can get better insight of the event.

- **Price List Page**

This page shows the **packages JCC** has to **offer**, and the **starting offer price**. Make sure to include a **brief description** of the **packages** to give the customer a better insight about the packages.

- **About Us Page**

This page provides **information** about JCC, such as **history** and the **certification JCC** were received. Make sure that the information is **relevant**.

- **Contact Us Page**

This page shows a contact **form** for customers. They need to submit their **personal information**, such as **name, email, phone number, message, and preferred contact method (phone and/or email)**. You are asked to create **5 kinds of form components** and **5 kinds of validation**. For validation, you must create it using **JavaScript** and **don't use regular expression**.

Guidelines:

- a. Design your website by observing the principles of **human and computer interaction**. Set up your site as **creative** as possible but still strive for **consistency**.
- b. The **website prototype** must be designed using **Figma** and make sure to create some **features**, such as color and text style, effect, component, variant or interactive component, and navigation.
- c. Consider the **color, font, size, and layout** that you use to design the prototype and website.
- d. All pages mentioned in the requirement should be created **based on your template design**.
- e. Use only **external CSS**. Internal or inline CSS will not be marked.
- f. Use **CSS box positioning** to design your web structure, do not use table for the layout.
- g. Consider the **language** you use, including spelling and grammar, feel free to choose either Bahasa or English, but you cannot have both at the same time.
- h. Organize your files with subdirectories.
- i. Include references (link from a website, book, etc.) that you use in creating the website.
